

**Using non-compliant steel can take on
a new meaning if something goes wrong.**

Trouble.

(noun.) *Mental or emotional distress, worry, discomfort, unfortunate or distressing position, circumstance, occurrence, misfortune.*

- If you're unsure of the steel material used in your construction, it could land you in serious trouble.
- When heavy losses and personal reputations are at stake, it's important to be confident that structures have been built correctly.
- It's important to be confident that structures that are built comply with Australian/New Zealand Standards and the Building Codes.
- Understanding how you can protect yourself is critical. You have the power to refuse to use non-compliant steel.
- Don't leave steel compliance to chance, go the extra step and demand to see the ACRS Certificate of Product Compliance.
- It could just keep you out of trouble if something goes wrong.

Demand ACRS Certificates of Product Compliance, and stay out of trouble.
