WITH ACRS YOU KNOW YOU ARE COVERED.

- > **Independent Third Party:** The ACRS Board of Directors is structured to be independent of commercial interests. ACRS commissions its own testing, independent of suppliers
- > **Complies with international Standards:** ACRS complies with governing international Standards, including ISO65
- > **Not for profit:** ACRS is a not for profit service to the construction industry. Costs are kept to the minimum to ensure supplier compliance
- > **Product specific:** ACRS only assesses construction steels to AS/NZ Standards including AS/NZS4671 Reinforcing Materials, AS3600 Concrete Structures, AS2870 Slabs & Footings, AS5100 Bridge Design, AS/NZS4671 Steel Prestressing Materials, AS/NZS3679.1 Structural Steel Hot Rolled Bars & Sections, and AS/NZS1163 Cold Formed Structural Steel Hollow Sections
- > **Frequent verification:** ACRS reviews and attests production every three months throughout the year via independent testing, backed by rigorous annual site assessment
- > **A product certification body:** ACRS is not a quality certification or testing certification body. ACRS product certification reviews product compliance with specific materials Standards
- > **Expert:** ACRS assessors have technical backgrounds in construction steels
- > **Simple:** ACRS certificates can replace individual test certificates, reducing workload and process complexity
- > **Full coverage:** ACRS certifies all products, all processes and all locations of each certified firm against AS/NZ Standards
- > **Risk reduction:** ACRS certificates reduce risk of non-compliant materials arriving on your site
- > **Supported by industry:** ACRS member companies span the whole construction industry
- > **Internationally recognised:** ACRS is recognised internationally as a mark of excellence for construction steels
- > **Certificates have only 12-month validity:** All ACRS certificates are re-assessed annually against company performance to certified Standards to reduce risk of non compliant products reaching sites
- > **Includes local and overseas products:** ACRS is non-discriminatory, and certifies over 40 companies in 14 countries
- > **Proof of compliance:** Customers don't have to ask for proof of product compliance
- > **Full process:** Product sampling, testing, reporting and assessment are all undertaken by ACRS experts

**YOU NEED TO CHECK COMPLIANCE OF THE MATERIALS TO AVOID RISK OF FAILURE.
AN ACRS INDEPENDENT CERTIFICATION CAN SIGNIFICANTLY REDUCE THIS RISK.**

Full details of current ACRS certificate holders are at www.acrs.net.au or www.steelcertification.com
If there's any doubt, please contact ACRS on (02) 9965 7216 or email info@acrs.net.au
